Easy administration tool
Management of contacts, residents and staff in one place

## MESSAGES
Send information in real time to your teams
One-way transmission of messages
Time validity of messages
Priority messages (with alarm sounds)

# REQUIREMENTS

**Modernize your GETS system**
Install the new GEC central in your building.

**Smartphones for the staff**
Equip caregivers with smartphones authorized to use the app.

**Certified Interface**
For the connection to the server, a certified interface between the two systems is required.

**3G, 4G, 5G Network**
Your building must have a GSM, 3G, 4G or 5G network covering your entire establishment. If this is not the case, «inhouse GSM» solutions are available.
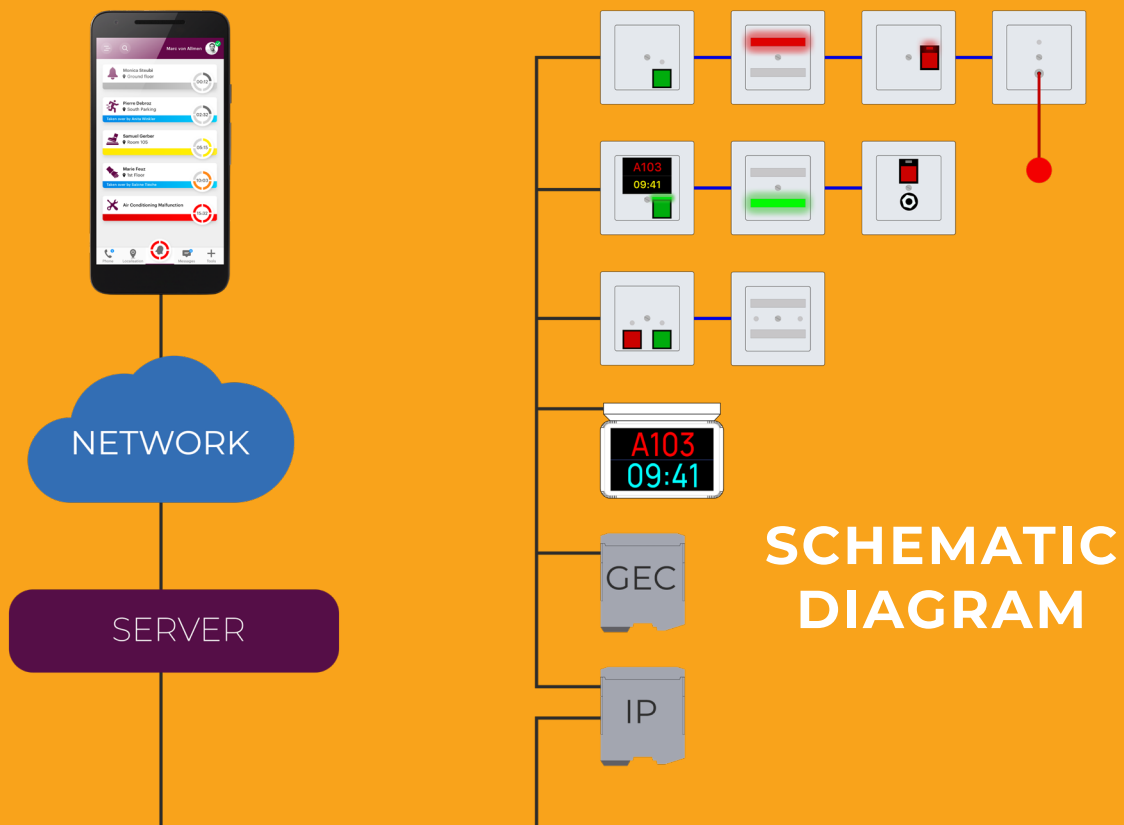

**WLAN in the whole building**
Optional, to ensure redundancy and security in your facility. You need WLAN in all areas.

**Alarm matrix**
Define an alarm matrix to send the right information to the right person at all times.
